

# SLOT MACHINES

---

GAME EXPLANATION

# AIM OF THE GAME

---

You win on a slot machine when you have the same symbols on one of the win lines.

**HINT** Some slot machines also have 'Wild' symbols, so even more combinations!

# WIN LINES

---

Slot machines have different numbers of line combinations that you can win on (also called 'win lines'). Ranging from 1 to over 200.

You can see the number of win lines on the slot machine or on the button panel.

**HINT** For your best chance, always play with all win lines.

# WINNING

---

When you have a couple of the same symbols on a win line, you win!

How many symbols are needed and how much you win is different per machine.

Some slot machines also have bonus games for extra wins. You will find out when it happens!

**HINT** Use the Circle Monte-Card Player Club card to collect points while playing.

## **PLAYING WITH CREDITS**

---

Each slot machine will accept bills. When inserting a bill or a ticket in the machine, the value of the bill or ticket is transferred to the credit meter.

**HINT** Find a slot machine that suits your budget. Look at the credit value on the slot machine.

## BET PER SPIN

---

Per spin you determine how much you want to bet.

Choose the number of credits you want to bet per win line or per spin.

For example, betting 5 credits per line on a machine with 10 lines and a credit value of € 0,02 costs € 1,00 per spin.

## STOP PLAYING

---

Do you want to stop playing? Simply push the "Collect" or "Cash out" button.

Your credit value will be printed on a ticket. With this ticket you can continue playing on another slot machine or go to the Cashier to cash out.

**Note** When the amount is very high, a member of staff will come to personally hand over your winnings.
