

### AIM OF THE GAME

Beat the dealer!

The objective is to get a better hand than the dealer.

Make the best Poker hand with only 3 cards, a fun and fast game.

### CASINO CHIPS

To play you need casino chips. You can get them at the cashier or from the croupier at the table.

Simply put your money on the table and the croupier will exchange it for casino chips.

### START TO PLAY

Place your bet in the "Ante" box.

There is a side bet, called Pair Plus. When you place a bet on Pair Plus and your hand is a Pair or better, you win regardless of the result of the dealer.

### START OF THE GAME

The game starts when the croupier swipes his arm over the table.

The croupier will deal three cards face down to all players and himself.

### BET OR FOLD

You look at your cards, not showing them to others or the dealer.

When you think you can beat the dealer, you place a bet that matches your Ante bet on the "Play" box.

When you do not have good cards, you Fold: You lose your Ante bet.
